- When ordering surface mount mirrored cabinets for use with a fly-over light, specify "No Crown Molding" and "No Lights".
- For model with crown molding placed next to a wall(s) add \$99 to list price for each end next to wall, and specify which end(s) is next to wall.
- Crown molding adds 1 3/8" to depth and 2 7/8" to width.
- For right hand hinge place an "R" in position 7 of the mirrored cabinet with light model number to hinge door on right.
- For Models with Lights, the Door Code is used to specify both the Light Front Style and Mirrored Door Style (B - Beveled, 7 - Bead Edge or 8 - with Pegs). Use price columns for B, 7 or 8.
- Beveled mirror can be replaced with non-beveled mirror for same price. For non-beveled mirrors see Personal Design Options.
- Mirror with inside Bevel, to match Ultra door style is only available for Mitered Frame Mirrors.

Cabinet graphics are shown below with nonspecific hardware and light globes.

Design Consideration:

Mirrored Cabinets are often ordered 6" narrower than the vanity, which often eliminates the need for an End Next to Wall Option.

48" Parkway Table Vanity with Shaker door and drawer style and 24" Mitered Framed Mirror in Maple Beachside stain. Shown with optional hardware and a Bellingham Cambria quartz top.

Notes and Exceptions

- For model with crown molding placed next to a wall(s) add \$99 to list price for each end next to wall, and specify which end(s) is next to wall.

- Crown molding adds 3/4" to depth and 2 7/8" to width.

For Ashford or Lambiere, the Door Code will always be Z (1-piece light front) and Mirror style will always be B. For all other Collections your Mirrored Door Style will be the wood door style code of your matching vanity and will generate the Mirrored Door Style code in parenthesis as follows: Edgewood (7), Fairfax (7), Lawton (8), Old Town (8), Prestige (B), Ridgefield (B), Shaker (B), Wilton (B), Ultra (B).
- Cherry Rustic is not available in Bead Edge (Code 7) or Ultra Door (Code 4) Door Styles.

Notes and Exceptions

- For model with crown molding placed next to a wall(s) add \$99 to list price for each end next to wall, and specify which end(s) is next to wall.

- Crown molding adds 1 3/8" to depth and 2 7/8" to width.
- For right hand hinge place an "R" in position 7 of the medicine cabinet with light model number to hinge door on right.
- This cabinet is hinged left but is not drilled for hardware since the door hangs below the cabinet frame by 3/8" - which is enough for finger pull opening.
- This model uses a Mitered Frame Mirror for the door. It is not available in Door Style 8.
- For Models with Lights, the Door Code is used to specify both the Light Front Style and Mirrored Door Style (B - Beveled, 7 - Bead Edge or 8 - with Pegs). Use price columns for B, 7 or 8. For Monterey, the Door Code will always be Z (1-piece light front) and Mirror style will always be B. For all other Collections your order's Mirrored Door Style will be the wood door style code of your matching vanity and will generate the Mirrored Door Style code in parenthesis as follows: Edgewood (7), Fairfax (7), Lawton (8), Old Town (8), Prestige (B), Ridgefield (B), Shaker (B), Wilton (B).
- This model has 2 sections of storage on either side with a center mirror. See specifications at woodpro.com.
- Monterey height is 1 5/8" less than stated height.
- This recessed cabinet can also be surface mounted.

Cabinet graphics are shown below with nonspecific hardware and light globes.

Design Consideration: Medicine Cabinets are often ordered 6" narrower than the vanity, which often eliminates the need for an End Next to Wall Option.

Wall Mount Cabinet Structure and Installation

Wall mount vanities present challenges to both the manufacturer and the installation contractor. Woodpro designed metal corner braces that greatly strengthen the vanity once it's on the wall. Two-bowl models have additional braces. The wall itself, however, must be prepared for the weight of the vanity.

The wall mount vanity requires a horizontal cut-in brace centered 33" above floor level. The brace is a 2x10 (or larger) and must be at least long enough to tie in to a stud on each end of the vanity. If there are no local building codes, we recommend securing the 2x10 to each stud with 3 (ea) 16-penny framing nails or 2 1/2" screws.

The wall mount linen tower requires an additional cut in brace centered 60" above floor level. It must be a 2x6 or larger and must be long enough to tie into a stud on each side of the linen tower. If there are no local building codes, we recommend securing the 2x6 to each stud with 2 (ea) 16-penny framing nails or 2 1/2" screws.

For additional support, and as an aid to installation, we provide a wood strip for attaching to the wall at the bottom of the cabinet.

Please educate your consumers. The additional brace in the wall is required. Failure to properly augment the wall will result in out-of-warranty product failure and possibly even injury or death. See complete instruction at woodpro.com

Tip Out Tray Option

Chest Vanities with "Pipe Chase Drawers" have the look of a 3-drawer chest of drawers. Pipe Chase drawers are constructed to give as much drawer space as possible while clearing the sink bowl and plumbing pipes. Configurations vary by vanity Width and Construction Type (Overlay or Molding Overlay). Overlay (O) Collections are: Ashford, Lambiere, Gentry and Valencia. Molding Overlay (MO) Collections are: Estate, Fireside, Heirloom, Monterey and Nottingham.

For 24" – 42" one drawer stack models, the middle Pipe Chase Drawer (see photo, page 1.53) only has to clear the plumbing pipes. The width allowed in the center back of this middle drawer is 7" and the depth, from the back of the cabinet is 14". For the top drawer, there is not enough clearance for the bowl on 24" O & MO, 30" O & MO, and 36" MO construction so it is a false drawer front on these models. A top Pipe Chase drawer (see drawing on right) will be in 36" O construction and 42" O & MO construction models.
